

GABRIEL PORTO CAMARILLO

Full Stack Developer | Node.js • Angular • React

Aguascalientes, México | 4491985370 | <mailto:porto1472@gmail.com> | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) |

PROFESSIONAL SUMMARY

Full Stack Developer focused on MEAN/MERN technologies, backend development with Node.js and Express, REST API integration, automation workflows, and scalable web applications. Experience building real-world projects involving biometric validation, process automation with n8n, mobile integrations, Docker-based environments, and AI-assisted solutions.

TECHNICAL SKILLS

Frontend: Angular, React, HTML, CSS, JavaScript

Backend: Node.js, Express

Database: MongoDB, Firebase

DevOps & Tools: Docker, PM2, Render, Postman, Git, GitHub

Automation: n8n, workflow automation, Node.js scripting

AI Tools: ChatGPT, Claude, Gemini, Codex

Methodologies: Scrum, Git Flow

EXPERIENCE

Informatic-Help-Agency — Process Automation

2024 – Present | Aguascalientes, México

- Automated internal workflows using n8n and Node.js to reduce repetitive manual tasks and improve operational response times.
- Integrated APIs and automation flows for business operations and internal process management.
- Worked with scalable backend structures and deployment-oriented development practices.

Informatic-Help-Agency — E-commerce

09/2025 | Aguascalientes, México

- Developed an e-commerce platform using frontend and backend architecture for catalog management and business operations.
- Built REST API integrations and scalable service flows for real operational usage.
- Implemented backend services with Node.js and MongoDB.

IDENTY.IO Biometric Assistance Application

2026 – Present

- Integrated biometric SDKs and REST APIs for employee identity validation and attendance tracking.
- Developed digital identity workflows and mobile integrations for biometric validation systems.
- Worked with external SDK integrations and authentication-oriented flows.

Technical Training Program — Inadaptados

2025 – Present

- Advanced training in Full Stack development using MEAN/MERN technologies.
- Applied scalable architecture principles and collaborative development practices.

PROJECTS

Moodle-AI Bridge

- Developed automation scripts with Node.js and PM2 for persistent execution of academic event workflows with IA API.

AI Prototyping

- Forex trading bot with analysis logic, automation, and decision support.
- Reading PDFs with AI to extract, interpret and organize information from legislative processes.

EDUCATION

Information and Communication Technology Engineering

Technological Institute of Aguascalientes

2023 – Expected Graduation: 01/2027

CERTIFICATIONS & COURSES

- CCNA: Enterprise Networking, Security and Automation — CISCO
- PROTON International Certification
- HCIA-5G V2.0 Course — Huawei ICT Academy
- Blockchain Consultant Professional — Blockdemy
- Artificial Intelligence and Data Science — Blockdemy

LANGUAGES

Spanish — Native

English — B2
